

Name – Manish Khyalia

Week – 4

Azure Cloud Fundamentals and Data Pipeline Implementation using ADF.

Screenshots:

The first screenshot shows the 'week4-container' in the Azure portal. The breadcrumb navigation is 'Home > celebalmanishst_1783592628726 | Overview > celebalmanishst | Containers'. The left sidebar shows 'Overview', 'Diagnose and solve problems', 'Access Control (IAM)', and 'Settings'. The main area shows the container 'week4-container' with an authentication method of 'Access key'. Below this is a search bar and a table of blobs. The table has columns: Name, Last modified, Access tier, Blob type, Size, and Lease state. One blob is listed: 'Sample - Superstore.csv' with a last modified date of 9/7/2026, 4:27:29 pm, Hot (inferred) access tier, Block blob type, 2.18 MiB size, and Available lease state.

The second screenshot shows the 'celebalmanishst' storage account in the Azure portal. The breadcrumb navigation is 'Home > celebalmanishst_1783592628726 | Overview > celebalmanishst'. The left sidebar shows 'Containers' selected, with other options like 'Classic file shares', 'Queues', 'Tables', 'Security + networking', 'Data management', 'Settings', and 'Monitoring'. The main area shows a search bar and a table of containers. The table has columns: Name, Last modified, Anonymous access level, Lease state, and Storage connector. Two containers are listed: '\$logs' and 'week4-container', both with a last modified date of 9/7/2026, Private anonymous access level, and Available lease state.

The screenshot displays the Microsoft Azure Data Factory console. The left sidebar shows the 'Factory Resources' tree with 'Pipelines' expanded, listing 'copy_superstore_pipeline'. The main canvas shows a pipeline diagram with two activities: 'Get Metadata' (labeled 'Get Metadata1') and 'Copy data' (labeled 'Copy data1'). Below the diagram, the 'Output' tab is selected, showing the 'Pipeline status' as 'Succeeded'. A table lists the activities and their execution details.

Activity name	Activity status	Activity name	Run start	Duration	Integration runtime
Copy data1	✓ Succeeded	Copy data	7/12/2026, 1:40:21 AM	15s	AutoResolveIntegrationRuntime (Centr
Get Metadata1	✓ Succeeded	Get Metadata	7/12/2026, 1:40:07 AM	13s	AutoResolveIntegrationRuntime (Centr

Pipeline Execution Results

- **Pipeline Status: Succeeded**
- **Get Metadata Activity: Succeeded**
- **Copy Data Activity: Succeeded**

- **Destination file created successfully.**

The screenshot displays the Microsoft Azure Data Factory interface. On the left, the 'Factory Resources' pane shows a list of pipelines, with 'copy_superstore_pipeline' selected. The main canvas shows a pipeline diagram with two activities: 'Get Metadata1' and 'Copy data1', both marked with green checkmarks indicating success. Below the diagram, the 'Output' tab is active, showing the pipeline run ID '3e65e84c-4c37-4a19-8752-df969c697d6e' and a status of 'Succeeded'. A table lists the activities and their execution details.

Activity name	Activity st...	Activit...	Run start	Duration	Integration runtime
Copy data1	✓ Succeeded	Copy data	7/12/2026, 1:40:21 AM	15s	AutoResolveIntegrationRuntime (Centri
Get Metadata1	✓ Succeeded	Get Metadata	7/12/2026, 1:40:07 AM	13s	AutoResolveIntegrationRuntime (Centri

Summary :

Created an Azure Resource Group, Azure Storage Account, and Azure Data Factory. Configured Blob Storage and created a Linked Service between Azure Data Factory and Blob Storage. Created source and destination datasets and developed a pipeline using Get Metadata and Copy Data activities. The pipeline successfully validated the metadata of the source file and copied the CSV file to the destination location. The pipeline executed successfully without any errors.
